

Figure 10 is a contour plot showing the distribution of the number of days with precipitation exceeding 1 mm per day. The x-axis represents longitude from 162°E to 102°W, and the y-axis represents time from -3 years to +3 years relative to the 1997-1998 El Niño event. The plot shows a large area of high precipitation (dark blue) centered around 174°W and 0 years, and a large area of low precipitation (red) centered around 150°W and -1 year.
